

FIRST CALL FOR PAPERS

The corrosion and protection of materials is an important scientific field attracting major interest from domestic and international researchers and experts. The First International Workshop on “Corrosion and Protection of Materials” will be held in Hanoi from December 4-7, 2012, facilitating the exchange of knowledge and information relating to materials degradation and protection solutions. The Workshop is also an opportunity for participants to meet and interact with counterparts from academia and industry.

On December 4 a short course on **electrochemical methods** in the study of corrosion and material protection will be held. Registration and reception is in the afternoon. On December 5-6, presentations, discussions and a poster session will take place. A trip to Halong Bay (a World Natural Heritage Site in the Northeast of Vietnam) has been arranged for December 7.

The Institute for Tropical Technology at the Vietnam Academy of Science and Technology is honored to organize The First International Workshop on “Corrosion and Protection of Materials”.
